

The ASE XXII Planetary Congress

Planetary Congress of Space Explorers
organized by Intelligent Transport Systems & Services
and by the Association of Space Explorers (ASE)

28.10.2009

Special follow up at High Level Seminar on ITS for Bulgaria

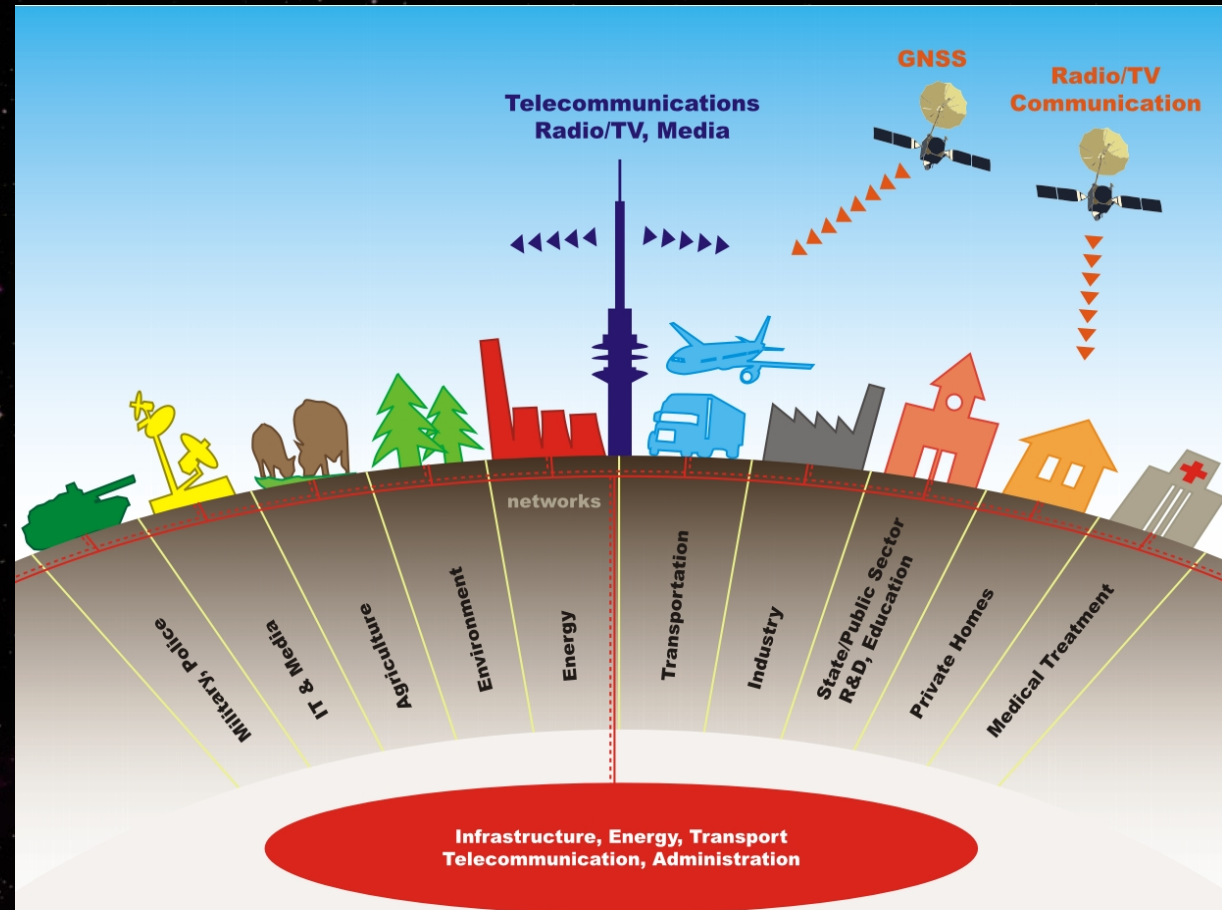

Space in the view of the Czech industry

Roman Srp
ITS&S

We live in a digital world

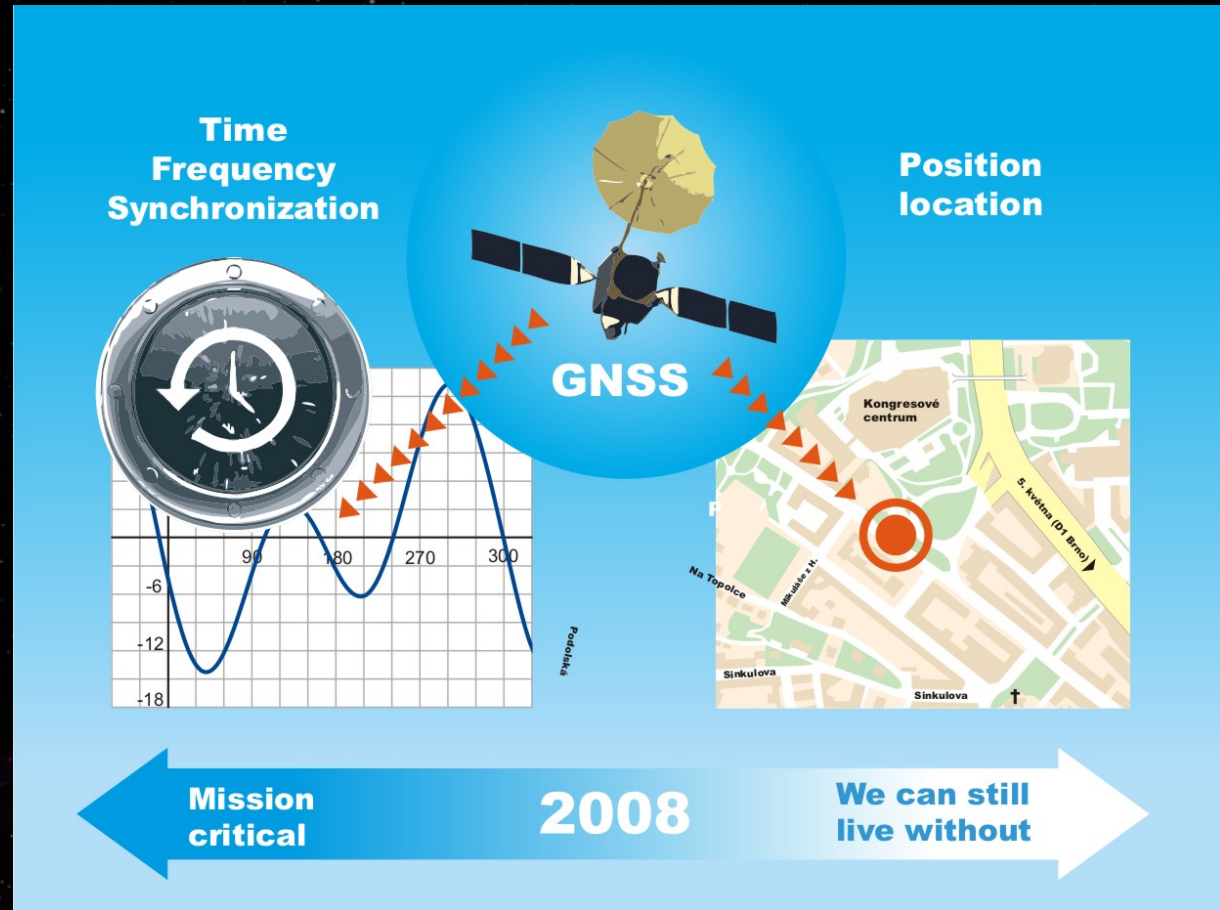

- Our measures: GHz, Gb, Gbps, 1n
- Space technologies are an integral part of the economy and critical infrastructure.

Global navigation satellite systems

Czech industry. Why space?

- Difficult
- Expensive
- May be lower profit
- Long term return of investment

but also

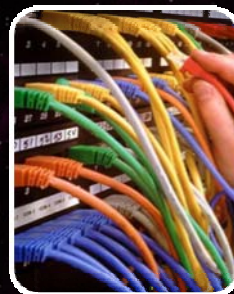

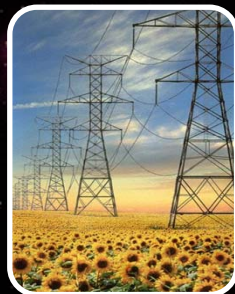

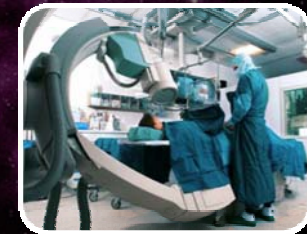

- Challenge
(healthy transport of a human to space and back is one of the main achievement at all)
- **Reliable investment into future prosperity of everybody!**

Czech Space Opportunity

- Participation on space infrastructure R&D, deployment and operation
- Development & production of space technologies
- Application of space technologies in all sectors of Czech economy
- Export of products and services

General Conditions of Czech Industry Success in Space

- Have a common understanding within industry
- Set up an intensive co-operation between industry & state administration
- Support political ambitions of the CZ
- Efficient public relation policy
- Create positive attitude in general public
- Looking for partners abroad, establish cross border co-operations
- Support international networking
- Active involvement of national governments on an international level

Conclusion

We live in a Digital World

Let's improve its functions to achieve better safety & quality of people's life and cleaner environment.
